City of Norfolk, VA Awards Black Creek Contract to Upgrade Security System

NORFOLK CITY PUBLIC SAFETY BUILDING

Birmingham, AL – March 7, 2016 - Black Creek has been awarded a contract to upgrade the existing security system at the Norfolk City Jail. The jail is a 833-bed facility located in Norfolk, Virginia.

The upgrade will involve removing all existing graphic panels, touchscreens, and other outdated security equipment, the installation of 14 new [Super Display®](#) Touchscreen control stations, a new intercom system, CCTV system, card access system, and utility control panels. The work also includes extensive modifications and replacement of aging sliding door hardware

Each Super Display® Touchscreen station features up to three LCD monitors that display all the facility's security controls and a CCTV camera call-up and video display. An officer can easily select different camera viewpoints, control facility utilities, and more. The system provides agencies with a modern solution that incorporates all aspects of correctional facility physical security into a single, fully integrated package.

The new Black Creek system will improve the safety of staff and visitors and provide enhanced security functionality the current system does not have. Security control will become much easier and the facility will save money by decreasing maintenance costs and increasing staff efficiency.

More about Black Creek ISC

Black Creek Integrated Systems is a turn-key source for modern, touchscreen-based, correctional facility security control systems and security management software solutions that reduce the cost of corrections. Black Creek focuses only on the corrections market – installing integrated security and records management solutions in jails, prisons, courthouses and government facilities across the nation.
