Birmingham, AL – January 1, 2016 – Black Creek Integrated Systems has been awarded a contract to upgrade the electronic security system to a Super Display® Touchscreen Security System for the Franklin County Jail. The jail is a 120-bed facility built in 1993 and is located in Malone, New York.

Black Creek has been working with Franklin County since 2008. The facility currently uses Black Creek's [SallyPortNY®](#) Jail Management System. The installation of the [Super Display® Touchscreen Security System](#) with SallyPortNY® will allow

officers to pull up inmate data on housing unit touchscreen stations, automate many inmate data collection and log entry tasks, and streamline facility operations.

Black Creek will replace all of the jail's existing monitors and touchscreens with Black Creek's 32" Super Display® Touchscreen, furnish and install new cameras, a digital video recording system, a gigabit Ethernet network, and intercom stations.

The new Black Creek system will increase the safety of staff and visitors at the jail by providing functionality the current control system does not have. Each Super Display® Touchscreen station features two LCD monitors that display all the facility's security controls and a CCTV camera call-up and video display. The system upgrade will make security control easier and save the facility money run by decreasing maintenance costs and increasing staff efficiency.

### More about Black Creek ISC

Black Creek Integrated Systems is a turn-key source for modern, touchscreen-based, correctional facility security control systems and security management software solutions that reduce the cost of corrections. Black Creek focuses only on the corrections market – installing integrated security and records management solutions in jails, prisons, courthouses and government facilities across the nation.
