

****FOR IMMEDIATE RELEASE****

Santa Barbara County, CA Awards Black Creek Contract for ACTS Reentry Software Installation

SANTA BARBARA COUNTY JAIL VISITOR'S ENTRANCE

Birmingham, AL – August 4, 2015 – The Santa Barbara County California's Sheriff's office has selected Black Creek to install its Applied Correctional Transition Software (ACTS) to be used in correctional facilities located across the county. The county has three correctional facilities, with a total rated capacity of 800 inmates. Black Creek will also be providing the correctional facilities with on-site training and a support plan upon installing the software.

Black Creek's [ACTS](#) software greatly reduces recidivism in jails by offering jurisdictions the ability to quickly screen all populations for the risk to reoffend. For pretrial offenders it offers the flexibility to bypass full risk assessment in order to avoid forensic or legal conflict. Designed by veterans in the corrections profession, ACTS puts information at the fingertips of jail administrators, officers, practitioners, therapists and policy-makers to ensure that the actions they take regarding correctional policy & procedure lead to the most productive and cost-effective outcomes.
