

****FOR IMMEDIATE RELEASE****

Black Creek to Install Jail Management Software at Schoharie County, NY Jail

SCREENSHOT OF SALLYPORT® JAIL MANAGEMENT SYSTEM

Birmingham, AL – September 29, 2015 – Black Creek has been awarded a contract to install its [SallyPort®](#) jail management software in the Schoharie County Jail, New York. SallyPort® is a full-featured electronic inmate records management system designed for city and county jails that accurately maintains inmate records with the capacity to meet or exceed all mandatory requirements of any state or jurisdiction.

SallyPort® is customizable to a jail's specific needs. The modules that Schoharie County Jail will have installed include digital mugshot capture, demographic, video lineup, inmate fund, contacts/visitation, threat group, and more. The installation will also include a driver's license scanner interface that can automatically enter driver's license data through an IDWedge® scanner.

The installation of the jail management system will save the jail money by decreasing the administrative time needed to manage inmate records. Additionally, SallyPort® is designed to fully integrate with Black Creek's [Personal Detention Assistant® Super Display® Control System](#), "VINE" integration and other systems—such as document management for paperless operations.

More about Black Creek ISC

Black Creek Integrated Systems is a turn-key source for modern, touchscreen-based, correctional facility security control systems and security management software solutions that reduce the cost of corrections. Black Creek focuses only on the corrections market – installing integrated security and records management solutions in jails, prisons, courthouses and government facilities across the nation.
