## Black Creek Video Visitation Selected for Nunavut Qikiqtani Correctional Healing Centre

---

Birmingham, AL – October 8, 2019 - Black Creek Integrated Systems Corp. has been awarded a contract to supply the video visitation system at the new Qikiqtani Correctional Healing Centre being built in Iqluit, Nunavut, a territory of Canada. Black Creek will furnish inmate and public video visitation stations (including one hands-free/handicapped station), three portable inmate stations on mobile carts (for infirmary use and in other areas where an inmate may be incapacitated), a scheduling kiosk, an administrative/scheduling/enrollment workstation, a monitoring workstation, an application server, a recording server, a telephone messaging server, and associated network equipment. Installation will be handled by Paladin Technologies of Ottawa, Ontario, Canada. Black Creek's IP Visitor software will be provided to manage and record visits as well as perform scheduling and administration.

A Black Creek IP Visitor® Video Visitation system enables family members, friends, and professionals to visit the incarcerated both on-premise and remotely from their homes or offices. The remote visitation option is generally more cost-effective than in-person trips for most visitors to the facility. The system can significantly increase security while generating revenue for a facility. Learn more about [Black Creek's IP Visitor Video Visitation System >](#)

### More about Black Creek ISC

Black Creek Integrated Systems is a turn-key source for modern, touchscreen-based, correctional facility security control systems and security management software solutions that reduce the cost of corrections. Black Creek focuses only on the corrections market – installing integrated security and records management solutions in jails, prisons, courthouses and government facilities across the nation.
