City of Anaheim Awards Black Creek Detention Facility Security System Upgrade

ANAHEIM POLICE DEPARTMENT, WHERE THE DETENTION FACILITY IS LOCATED.

Birmingham, AL – January 28, 2015 – The city of Anaheim, California has awarded Black Creek a contract to upgrade its existing security system to a new [Super Display®](#) Touchscreen Security System. The existing Black Creek system has been in operation in the 120-bed facility since 2005.

The project includes installing three new Super Display® Touchscreen control stations, network equipment, IP cameras, and intercom master stations. Existing Black Creek

touchscreen and server software will also be upgraded. Video signals and microphone audio from the cameras will be recorded 24/7 on new network video recorders (NVRs).

The system upgrade will make security control easier and save the facility money by decreasing maintenance costs and increasing staff efficiency. Safety of visitors and staff will improve from the new features the current control system does not have. Each Super Display® Touchscreen station will feature up to three LCD monitors that display all the facility's security controls and a CCTV camera call-up and video display. An officer can easily select different camera viewpoints, control facility utilities, and more.

More about Black Creek ISC

Black Creek Integrated Systems is a turn-key source for modern, touchscreen-based, correctional facility security control systems and security management software solutions that reduce the cost of corrections. Black Creek focuses only on the corrections market – installing integrated security and records management solutions in jails, prisons, courthouses and government facilities across the nation.
