Birmingham, AL – January 20, 2015 – Black Creek has been awarded a contract to upgrade the electronic security system for the Eaton County Jail located in Charlotte, Michigan. Black Creek has been working with the 374-bed facility since 2002.

The jail currently uses a Black Creek Touchscreen Security System and IP Visitor® Video Visitation system that will be replaced with the latest versions.

The touchscreen system upgrade will include the installation of new Super Display® Touchscreen control/video monitoring consoles, voice-over IP (VOIP) desktop intercom masters, cameras, a security system server, network video recorders, and an upgrade of the existing Black Creek touchscreen and server software. Each Super Display® Touchscreen station features two LCD monitors that display all the facility's security controls and a closed circuit television (CCTV) camera call-up and video display.

The new IP Visitor® Video Visitation system will include the installation of 47 new Black Creek IP Visitor® inmate/public stations, administration computer, recording server, and new IP Visitor® scheduling/ administration software. Black Creek's IP Visitor® Video Visitation system features high quality video and audio streaming over the Internet, which makes visitation pleasant and accessible for family and friends. The system features electronic fingerprint capture, photo ID registration, and can store 30 days of recordings for investigative purposes.

The updated Black Creek systems will increase the safety of staff and visitors at the jail by providing enhanced security functionality and reducing on-site visitors. The facility will save money by decreasing maintenance costs and increasing staff efficiency.
