East Meadow, NY

Birmingham, AL – July 13, 2021 – Black Creek Integrated Systems Corp. has been selected to provide our *SallyPort*® Jail Management System for use by the Nassau Co. Sheriff’s Office. The Sheriff’s Office will use the Black Creek *SallyPort*® JMS software to manage inmate data at the Nassau Co. Correctional Center, located in East Meadow, NY, which has an average daily population of 1,905 inmates.

SallyPort® is a browser-based jail management system that provides greater efficiency and security for inmate records management via its many intrinsic features, including My Queues and workflow, digital mugshot image capture, inmate screening and classification, inmate time computation, inmate property inventory and transactions, inmate scheduling module, facility account module, standard and ad-hoc reporting capabilities, medical module, expansive audit capabilities, threat group assessment, intra-agency messaging, and electronic shift log to replace paper logs. Additional integration to be implemented for Nassau Co. will include an interface to the Agency’s records management system used for court and case data, a Live Scan fingerprint interface, an interface to the VINE database for victim notifications related to inmate releases, an interface to the facility’s GTL inmate phone system, and an Inmate Commissary interface. Driver’s license scanners and fingerprint scanners for use with the Live Scan application will be used to streamline data entry.

As part of its implementation of *SallyPort*®, the Nassau Co. Sheriff’s Office will also employ Black Creek’s wellness check and guard tour system, **Watch Tour Manager**®, which allows agency management to ensure facility tours are conducted on schedule and in compliance with policy. Black Creek’s **Watch Tour Manager**® application is the most innovative correctional wellness check system in the industry and is fully integrated with *SallyPort*®. Using Android™ mobile devices, officers can conduct tours, capture images and videos, enter notes, and receive alerts, all from the palms of their hands. Supervisors receive real-time notification of missed or late tours, as well as advanced tracking and reporting of tours by officer, unit, alert type, and date range.

More about Black Creek ISC

Black Creek Integrated Systems is a turn-key source for modern, touchscreen-based, correctional facility security control systems and security management software solutions that reduce the cost of corrections. Black Creek focuses only on the corrections market – installing integrated security and records management solutions in jails, prisons, courthouses and government facilities across the nation.
