Black Creek Makes Prescriptions Easier with New E-Prescribe Plug-in for SallyPort® Jail Management System

Birmingham, AL – January 1, 2016 – Black Creek is proud to announce it has developed an e-prescribe plug-in for its users to submit prescriptions directly from an inmate’s medical record to a local pharmacy. The plug-in integrates with [SallyPort®](#), Black Creek’s jail management system, and has features that will reduce drug ordering delays, decrease liability, improve inmate health and safety, and save facilities money.

Prescribers can immediately order prescriptions and submit orders from a common prescriptions library with one click. Drugs can be sorted by name, brand, Rx, OTC, class and indication. Interactions, allergies, dose range, warnings and side effects can be immediately verified.

Black Creek’s new e-prescribe plug-in utilizes the Surescripts® Network, an electronic healthcare system used by hundreds of thousands of healthcare professionals nationwide. Certification with Surescripts® allows SallyPort® users access to over 95% of US-based pharmacies and a regularly updated drug database.

More about Black Creek ISC

Black Creek Integrated Systems is a turn-key source for modern, touchscreen-based, correctional facility security control systems and security management software solutions that reduce the cost of corrections. Black Creek focuses only on the corrections market – installing integrated security and records management solutions in jails, prisons, courthouses and government facilities across the nation.
