

****FOR IMMEDIATE RELEASE****

Tehama County, CA, Awards Black Creek Contract to Upgrade Security System

TEHAMA COUNTY JAIL (RED BLUFF, CA)

Birmingham, AL – April 9, 2018 – The Tehama County Sheriff’s Office has awarded Black Creek a contract to replace the outmoded graphic panel-based security control system at the Tehama County Jail with a state-of-the-art Black Creek [Super Display® Touchscreen](#) electronic security system. The jail is a 227-bed facility located in Red Bluff, CA. Tehama County has been a Black Creek client since implementation of Black Creek’s [SallyPort® CA Jail/Inmate Management System](#) (JMS) at the jail in 2013.

EXISTING GRAPHIC PANEL

The upgrade will involve replacing an existing graphic panel system with a **Super Display®** touchscreen control system. New touchscreen control stations will be installed at four control locations throughout the jail. As part of the implementation, new server and utility computers and new Voice-over-IP (VOIP) intercom exchange and master stations will be installed. The obsolete analog camera system will be replaced with new digital cameras and a new Digital Video Recording System. Associated network infrastructure (programmable logic controllers, Gigabit Ethernet switches, etc.) will be updated as needed to support the new system.

SUPER DISPLAY® TOUCHSCREEN CONTROL SYSTEM

Each **Super Display®** Touchscreen station features up to three 32” LCD monitors that display all the facility’s security controls and CCTV camera call-up and video display. An officer can easily select different camera viewpoints, lock/unlock doors/gates, answer intercoms, control facility utilities, and more. The system provides agencies with a modern solution that incorporates all aspects of correctional facility physical security into a single, fully integrated package.

The upgraded security system will also seamlessly integrate with Black Creek’s **SallyPort® CA** JMS already installed at the facility. This full integration with inmate records allows officers to view inmate summary data, including known gang affiliations, disciplinary warnings, etc., on the Touchscreen control station thereby increasing both staff and inmate safety.

More about Black Creek ISC

Black Creek Integrated Systems is a turn-key source for modern, touchscreen-based, correctional facility security control systems and security management software solutions that reduce the cost of corrections. Black Creek focuses only on the corrections market – installing integrated security and records management solutions in jails, prisons, courthouses and government facilities across the nation.
