****FOR IMMEDIATE RELEASE****

Cattaraugus County, NY, Awards Black Creek Contract to Upgrade Jail Security System

Birmingham, AL – May 9, 2018 – The County of Cattaraugus, NY, has awarded Black Creek a contract to replace the existing security control system at its 150-bed Cattaraugus County Jail located in Little Valley, NY with a state-of-the-art Black Creek [Super Display® Touchscreen](#) electronic security system. Cattaraugus County has also contracted to implement Black Creek's [SallyPort®NY Jail/Inmate Management System](#) (JMS) at the jail.

The security control system upgrade will involve replacing the existing touchscreen control stations with a **Super Display®** touchscreen control system. **Super Display®** touchscreen control stations will be installed at six (6) control locations throughout the jail. As part of the implementation, new server and utility computers will be installed, existing cameras will be replaced with new digital cameras, a new Digital Video Recording System will be provided, and network infrastructure (programmable logic controllers, Gigabit Ethernet switches, etc.) will be updated as needed to support the new system. The existing Harding intercom system will be re-used and integrated into the new Black Creek **Super Display®** control system. Existing duress devices will be re-used and integrated into the new control system. New utility control smart panels and relays will be installed and integrated to allow control of inmate lights, television receptacles, and water valves.

Each **Super Display®** Touchscreen station features up to two LCD monitors that display all the facility's security controls and CCTV camera call-up and video display. An officer can easily select different camera viewpoints, lock/unlock doors/gates, answer intercoms, control facility utilities, and more. The system provides agencies with a modern solution that incorporates all aspects of correctional facility physical security into a single, fully integrated package.

The upgraded security system will seamlessly integrate with Black Creek's **SallyPort®NY** JMS. This full integration with inmate records allows officers to view inmate summary data, including known gang affiliations, disciplinary warnings, etc., on the Touchscreen control station thereby increasing both staff and inmate safety.

More about Black Creek ISC

Black Creek Integrated Systems is a turn-key source for modern, touchscreen-based, correctional facility security control systems and security management software solutions that reduce the cost of corrections. Black Creek focuses only on the corrections market – installing integrated security and records management solutions in jails, prisons, courthouses and government facilities across the nation.
