

*** FOR IMMEDIATE RELEASE ***

Orange County, New York Selects Black Creek's SallyPort® Jail Management System

Birmingham, AL – July 2, 2018 – The Orange County New York Sheriff's Office has chosen Black Creek Integrated Systems' **SallyPort**® Jail Management System for implementation in its 750 bed, Orange County Correctional Facility located in Goshen, NY. Implementation has commenced and is scheduled for completion this Summer.

In conjunction with the implementation of **SallyPort**®, Orange County will also employ Black Creek's **Watch Tour Manager**® System which allows agency management to record facility wellness checks and ensure that they are being conducted on schedule and in compliance with policy.

The Orange County implementation brings to 39 the number of county agencies in New York State using SallyPort® which represents approximately 65% of all New York counties. All New York SallyPort® user agencies share inmate data over the internet through **SPIDEX**®, Black Creek's cloud-based SallyPort® Inmate Data Exchange.

More about SallyPort®

SallyPort® Ver. 4.0 is a, browser-based, CJIS-compliant, enterprise-class jail management system that provides increased efficiency and security for inmate records management thru its many intrinsic features, including: streamlined intake procedures utilizing work queues with structured workflows, digital mugshot image capture, inmate property inventory, screening and classification assessments, release date calculation, user-configurable pre-release checklist, grievance tracking, incident reporting and disciplinary actions, electronic medical records with E-Prescribe (an electronic prescription module for the direct creation and routing of inmate prescriptions to pharmacies), threat group assessment, intra-agency messaging, configurable alerts, an electronic shift log to replace paper logs, scanned documents management enabling paperless operation, customizable data analytics, standard and ad-hoc reporting, and expansive audit capabilities. In addition to the core application, **SallyPort**® includes a library of third party integrations such as V.I.N.E., live-scan fingerprint, various commissary systems and **SallyPort Edge**, Black Creek's third-party interface builder.

The latest Ver. 4.0 release of **SallyPort**® represents a new paradigm in jail management software in that its high level of configurability allows the software to be conformed to the operational needs of the agency rather than the agency having to conform its operations to the needs of the software.

More about Black Creek ISC

Black Creek Integrated Systems is a turn-key source for modern, touchscreen-based, correctional facility security control systems and security management software solutions that reduce the cost of corrections. Black Creek focuses only on the corrections market – installing integrated security and records management solutions in jails, prisons and courthouses across the nation.
