

****FOR IMMEDIATE RELEASE****

Black Creek Selected by Pittsburg Co., OK to Retrofit Jail Security Control System

Pittsburg Co., Jail (McAlester, OK)

Birmingham, AL – October 26, 2021 - Pittsburg Co., OK, has selected Black Creek Integrated Systems Corp. to replace the outdated physical security control system at the County Jail, which was installed by Montgomery Technology (MTI) in 2006, but no longer works as required. Black Creek will provide a new, state-of-the-art **Super Display®** touchscreen control system for the 125-bed facility located in McAlester, OK. The system retrofit will utilize existing field devices (e.g., door locks, intercoms, cameras, etc.) in order to minimize costs, while new headend equipment will be provided to maximize security and efficiency.

Black Creek will replace all existing touchscreen control stations with the latest Black Creek Super Display® touchscreen control stations, utilizing the Windows® 10 operating system and Black Creek's latest touchscreen control software. The project includes replacing the proprietary MTI new programmable logic controllers (PLCs) with new PLCs and control relays to manage the entire facility, new security server computers, and a new secure, high-speed VPN appliance for remote diagnostics and support via the Internet. Black Creek will also replace the existing obsolete analog intercom and paging system with a new Voice-over-IP based intercom system, including new intercom master stations and new paging amplifiers.

Existing cameras will be reused, as video quality has not been an issue. Black Creek will replace the existing CCTV video management system with a new state-of-the-art Bosch Video Recording and Management System. New digital video review workstations and a new firewall will be included.

The new Black Creek system will improve the safety of staff and visitors with its enhanced functionality that the current control system does not provide. Each Super Display® Touchscreen station features two LCD monitors that display all the facility's security controls and a CCTV camera call-up and video display. An officer can easily select different camera viewpoints, control facility utilities, and more. The system upgrade will make security control easier and save the facility money by decreasing maintenance costs and increasing staff efficiency.

More about Black Creek ISC

Black Creek Integrated Systems is a turn-key source for modern, touchscreen-based, correctional facility security control systems and security management software solutions that reduce the cost of corrections and public safety. Black Creek focuses only on the corrections and public safety markets – installing integrated security and records management solutions in jails, prisons, courthouses, and government facilities across the nation.
