Black Creek Awarded Shelby County Juvenile Facility Security System Upgrade

Black Creek Integrated Systems is pleased to announce that it has been awarded the Shelby County Tennessee Juvenile Justice Security System upgrade. Black Creek will be removing the existing facility security control systems and will be installing a brand new SuperDisplay© Touchscreen Security System in the facility. The Shelby County detention center includes secure housing areas for both boys (114 beds) and girls (21 beds). The scope of work includes door intercom control, emergency release, CCTV, paging, lighting, elevator controls and

secondary annunciation of the existing fire alarm system – all consolidated into the SuperDisplay© System.

Black Creek will be responsible for the software, hardware, installation, integration, training and system support services for the Shelby County facility. One of Black Creek's primary goals is minimizing disruption to the detention center's operations during removal of the antiquated existing system components. The new system will digitize and record footage from all existing indoor and outside cameras 24 hours a day, 7 days a week. This will enable the facility to refer to historical video footage for investigative purposes. Black Creek will make use of existing peripheral devices and integrate them in the SuperDisplay© Security System.

More about Black Creek ISC

Black Creek Integrated Systems is a turn-key source for modern, Touchscreen-based, correctional facility security control systems and security management software solutions that reduce the cost of corrections. Black Creek focuses only on the corrections market – installing integrated security and records management solutions in jails, prisons, courthouses and government facilities across the nation.
