SENTRY CARE

Sentry Care is a detainee well-being monitoring system designed to enhance safety and care for at-risk populations in correctional facilities. Facilities can choose between self-implementation or full professional support in Unmanaged and Managed versions. The system uses Personal Active Security Sensor (PASS) tags for real-time heart rate monitoring, tamper detection, and customizable alarms for vital thresholds. Unmanaged Sentry Care is ideal for cost-conscious, tech-savvy organizations, while Managed Sentry Care includes engineered drawings, on-site training, and project management. Both versions are scalable, economical, and designed to improve outcomes for vulnerable detainees while maintaining operational efficiency.

- **REAL-TIME MONITORING** for at-risk detainees, including heart rate tracking and tamper detection
- **FLEXIBLE OPTIONS** with *Unmanaged* and *Managed* tiers to fit facility needs and budgets
- **SCALABLE SYSTEM** ideal for use in pre-classification areas, medical units, and overflow locations
- **REDUCES RISKS** for vulnerable populations such as those detoxing, pregnant, or elderly
- **DESIGNED TO ENHANCE SAFETY** while meeting compliance standards

SENTRY STAFF

Sentry Staff is a zone-based RTLS solution focused on ensuring the safety of correctional officers, staff, and visitors through real-time duress monitoring. It features Personal Safety Device (PSD) tags and BT-5B badges, offering instant duress alerts with accurate location data and visual/audible alarms at monitoring stations. Designed for challenging correctional environments, the system is rugged and reliable, with devices offering features like man-down detection, an optional lanyard duress version, and locking belt clip. Sentry Staff integrates seamlessly with existing staffing and Black Creek systems, enhancing operational coordination and response times. Its scalable design makes it an ideal choice for facilities prioritizing the safety of their personnel and visitors.

- **REAL-TIME DURESS MONITORING** for correctional officers, staff, and visitors
- **INSTANT ALERTS** with accurate location data, reducing response times to emergencies
- **VISUAL AND AUDIBLE ALARMS** notify staff at monitoring workstations
- **SEAMLESSLY INTEGRATES** with facility staffing systems and other Black Creek products
- **SCALABLE** for use across various facility zones, allowing for facility growth

PERSONAL ACTIVE SECURITY SENSOR (PASS)

- Wrist worn & easy to sanitize
- Up to 30 days of battery life
- Field replaceable batteries
- IP68-rated rugged durability
- BLE encrypted transmission
- Over-the-air firmware upgrades

PERSONAL SAFETY DEVICE (PSD)

- Belt-worn device with steel or Tek-Lok belt clip
- Duress Button standard with optional secondary lanyard duress belt pull
- 3-day battery life
- USB-C fast recharge

SENTRY TRACK

Sentry Track is a full-featured Real-Time Locating System (RTLS) that delivers sub-meter tracking accuracy for detainees, officers, visitors, and critical assets like keys and tools. It utilizes advanced BLE devices such as PASS-5B/6B and PSD-5B/6B tags to provide location data, duress alerts, and biometric monitoring. Unique features like Out of Area and Keep Separate alarms enhance safety by enforcing movement restrictions and preventing conflicts. Sentry Track seamlessly integrates with Jail Management Systems (JMS) and other Black Creek solutions, ensuring comprehensive facility oversight. With its robust functionality and scalable design, Sentry Track is the ultimate solution for facilities requiring advanced monitoring and control.

- **SUB-METER TRACKING ACCURACY** for detainees, officers, visitors, and critical assets
- **ADVANCED SAFETY FEATURES** like Out of Area and Keep Separate alarms
- **PROVIDES REAL-TIME BIOMETRIC DATA**, duress alerts, and location monitoring
- **SCALABLE** for comprehensive facility-wide deployment, including outdoor areas
