

Black Creek Model BT-5B TSI PRISM™ BADGE TAG

integrity - innovation - quality

Product Overview

Designed for use by correctional facility program staff and visitors, the credit card-sized BT-5B Badge Tag provides a highly cost-effective solution for monitoring the real time location and number of wearers in the facility and analyzing their movement histories.

Equipped with a built-in duress button and visual transmission indicator, the BT-5B Badge Tag's available sub-meter tracking accuracy provides

for the annunciation of duress/panic situations on system monitoring consoles with pinpoint location accuracy giving wearers both protection and peace of mind.

The BT-5B Badge Tag is maintenance-free and once turned on, has up to a 3 year useful life at 1 second transmission intervals.
