

SallyPort[®] Municipal

Jail Management System

SallyPort® Municipal

JMS FOR HOLDING CENTERS AND LOCK-UPS

Black Creek's **SallyPort® Municipal** Jail Management System was designed for use in municipal lockups, central booking, and small agencies that hold inmates on a temporary basis. **SallyPort® Municipal** was designed using the same enterprise class jail management system that is used by jails and detention centers around the country but streamlined for smaller agencies. **SallyPort® Municipal** allows staff to document the information they need without the additional modules applicable to long-term lockup.

As a standalone application that interfaces with an existing records management system or as part of the Black Creek's Public Safety Suite, **SallyPort® Municipal** provides agencies with the tools they need to effectively manage the inmates in their custody while maintaining safety and security.

Mugshot Capture | Inmate Alerts | File Folder and Tabular Format | Electronic Shift Log | User-Configurable Quick-Access Menu Toolbar | User-Configurable Inmate Record Header

The screenshot displays the SallyPort Municipal interface. At the top, a navigation bar includes buttons for New Arrest, Edit Record, Print, Log Entry/Search, Shift Log, My Queue, Administrative, Reports, and Dashboard. A sidebar on the left contains a menu with options like Exit Record, Summary, Arrest Information, Contact Information, Charge/Hold Information, Alerts, Billing, Documents, Incidents, Housing Activity, and Release. The main area shows an inmate record for JONES, JOSHUA, with a mugshot and various fields for booking date, classification, and bond. Below this is a 'CHARGE/HOLDS LIST' table. An 'ARREST FORM' is also visible, containing sections for Arrest Information, Physical Information, and Inmate Address Information.
