

Television Signal Distribution System

HOW IT WORKS

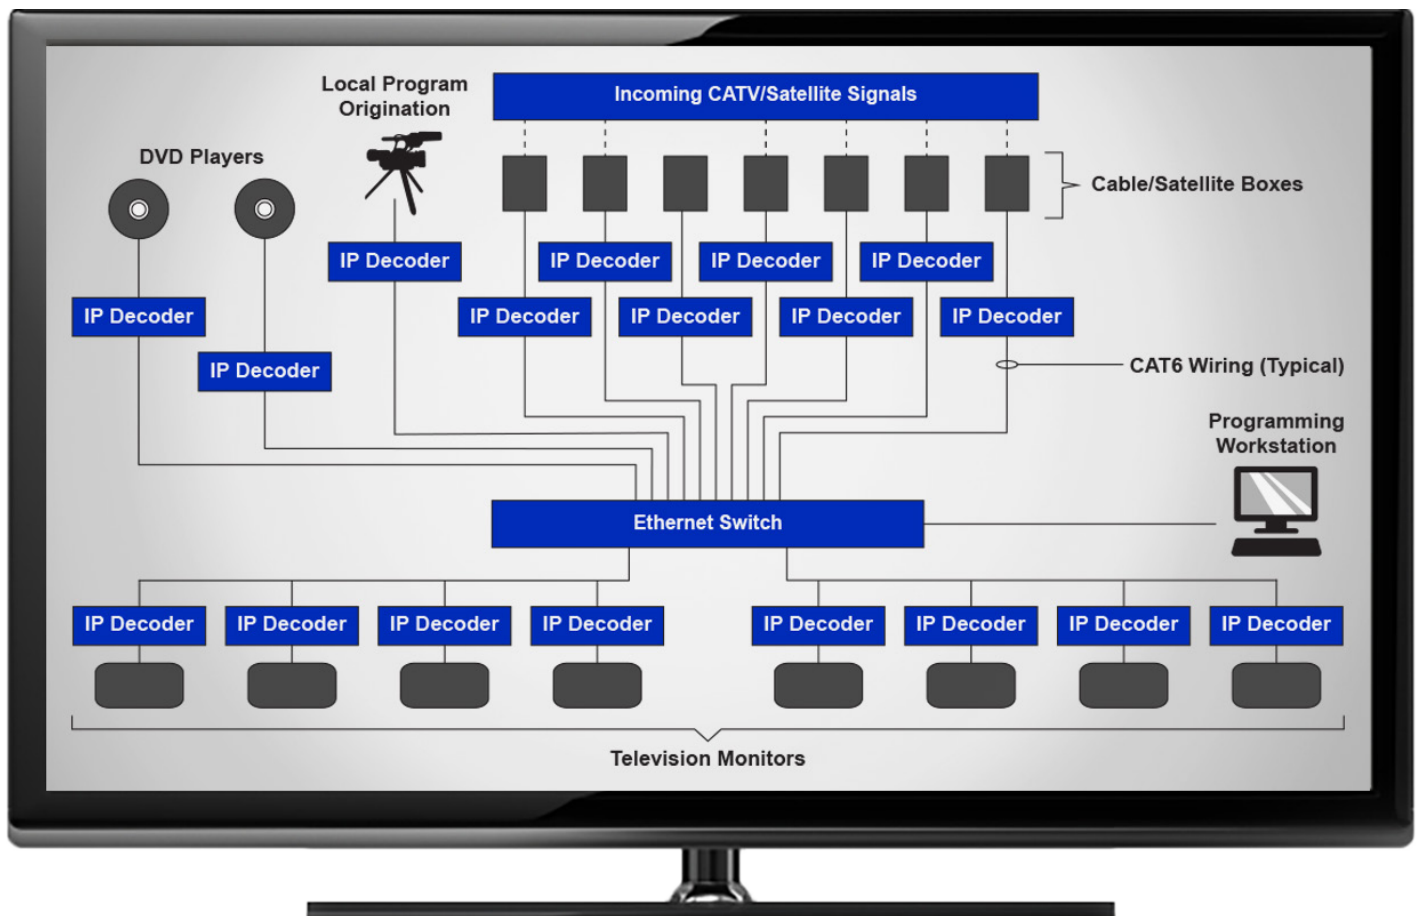

The **Black Creek TV Distribution System** offers flexible facility-wide programming and scheduling – all from your programming workstation. Incoming signals from cable, satellite, or local origin are encoded, distributed over an Ethernet-based local area network, and decoded at multiple TV sets in accordance with programming established by facility management.

PROGRAMMING CAPABILITY

- Flexible programming allows daily, weekly, or ad hoc scheduling for each display
- Channels automatically change throughout the day without staff intervention
- Create your own advertisements or information screens using industry standard HTML
- Easily integrates with existing cable or satellite networks

SYSTEM BENEFITS

- Control of facility-wide TV programming from single workstation
- Content-specific programming consistent with unit classification
- Controls unlimited number of TV's
- Local programming content + cable and satellite offerings
- Infinitely expandable
- CAT6 infrastructure, no coaxial cabling required
