Watch Tour®

Fully Integrated Solutions

BLACK CREEK

Watch Tour Application

Black Creek's **Watch Tour Manager®** application is the most innovative correctional wellness check system in the industry.

Using Android mobile devices, officers can conduct tours, capture images and videos, enter notes, and receive alerts all from the palm of their hands. Supervisors receive real-time notification of missed or late tours, as well as advanced tracking and reporting of tours by officer, unit, alert type, and date range.

SYSTEM ELEMENTS

Personal Detention Assistant©

- Increases transparency
- Enhances mobility, speed, and record keeping capabilities
- Provides greater versatility for line officers
- Features 802.11 Wi-Fi connectivity that allows officers using PDAs to move freely
- Ideal for controlling a direct supervision dayroom

RFID Technology

- Utilizes ruggedized, tamperproof RFID station tags
- Facilitates quick & accurate checkpoint readings
- Requires no additional wiring to function
- Uses **PDA©** scanner or any other compatible Android mobile device to generate instant reads at each checkpoint during the tour
- Logs data automatically in **Watch Tour Manager®** application

1.06in

1.06in

SallyPort© JMS

- Fully integrates with **SallyPort©**
- Implements watch tour alerts, reports, and configuration as a "plug-in" to **SallyPort©**
- Creates watch tour entry populated with inmate information from **SallyPort©** when officer scans inmate wristband during tour
- Enters data automatically into the **Shift Log** database
- Allows officers to search watch tour entries for specific inmates listed in **SallyPort©**

COMMAND STAFF PEACE OF MIND

There is nothing more frustrating for detention managers than to learn after an incident that watch tours were not being conducted in compliance with facility policy, or worse, were not being conducted at all. Tours that do not start or complete on time, do not complete in the proper sequence (if so configured), or are completed too quickly are annunciated on the tour manager console in real-time, allowing immediate corrective action to be taken. With Black Creek's *Watch Tour Manager®*, facility management can rest easy knowing that tours are being conducted on a timely and consistent basis.

CONFIGURABLE SCHEDULING & NOTIFICATION

Stay on schedule with *Watch Tour Manager's®* tour scheduling features. Facilities can configure tour frequencies so that the system will alert a supervisor if tours are not conducted on time. Administrators can configure tours that are frequency-based (tours conducted at programmed intervals throughout the day), fixed-time (tours start at specific times) or random (tours conducted at random start times with a configurable maximum time interval between tours). Minimum and maximum duration of tours, as well as station sequence and tour start annunciation are defined at the administrator level. Tours are configured, saved, and then assigned to housing units as required.

INTUITIVE APPLICATION

Watch Tour Manager's® comprehensive features and easy-to-use screens provide efficient and accurate watch tour management and data collection. The application is suitable for any user's technology comfort level.

STAFF & INMATE DATABASE INTEGRATION

Watch Tour Manager® application can integrate into your existing Jail Management System or with Black Creek's *SallyPort® Jail Management System.* Full integration allows staff to access all facility inmate data, log entries, and reporting from one location. Access to inmate information during tours provides enhanced officer and inmate safety.

CONCISE, OPERATIONAL REPORTING

Black Creek provides professional reporting for your operations through *Watch Tour Manager®*. Detailed reports on watch tour activities can be filtered by unit, officer, alert type, date range, exceptions, and users.

## REAL-TIME GRAPHIC INDICATION OF TOUR PROGRESS

Unlike other competing applications, a Black Creek *Watch Tour Manager®* workstation application provides real-time graphic indication of tour progress for all scheduled tours and an immediate notification of tour exceptions such as failure to start on time, late or early completion or failure to follow a designated route. With real-time notifications, response times are much faster, thereby increasing overall safety.

ADDITIONAL PERSONAL DETENTION ASSISTANT© CAPABILITIES

Optionally, the same mobile devices used to conduct watch tours can also be used for other jail management functions including tracking inmate movement, making shift log entries, dispensing medications, and viewing inmate data. The mobile devices can also be used for numerous physical security control functions.

Optional features include:

- Shift log entry using barcode scanning
- Inmate/resident movement tracking
- Positive inmate/resident identification
  - Access to inmate/resident data from Black Creek's Jail Management System, including digital images and summary tab information
- Physical security management
  - Locking system annunciation and control
  - VOIP intercom connectivity
  - Dayroom and cell utility control
  - Real-time CCTV camera display
- Personal duress signaling and annunciation
